

**40th INTERNATIONAL SYMPOSIUM ON CAPILLARY CHROMATOGRAPHY (ISCC) &  
13th GCXGC SYMPOSIUM**

The 40th International Symposium on Capillary Chromatography (ISCC), the premier meeting for pressure and electrodriven microcolumn separations and related techniques, will be held May 29 – June 03, 2016 in the Congress Centre, Riva del Garda, Italy.

**Organization:** International Symposium on Capillary Chromatography

**Disciplines:** Chemistry, Life Science

**Subdisciplines:** Analytical Chemistry, Chemistry, Life Science

**Event type:** Conference, Exhibition, Meeting

**Venue:** Congress Centre

The program will include plenary lectures, keynote lectures by young scientists, prominently featured poster presentations, an instrument exhibition displaying the latest instrumental innovations, and a highly attractive social program offering opportunities to meet with world-renown scientists.

This year particular emphasis will be directed to combinations of capillary chromatography and 2D GC with various forms of MS from unit-mass to high resolution, and from single to hybrid analyzers.

Researchers in all areas relevant to the subjects of the symposia, are invited to submit abstracts. As traditional for the Riva meetings, the majority of presentations will be in poster format and the scientific committee will select contributions for oral presentation.
